EDUCATION

B.Tech Computer Science (AI/ML)
GBPIET, Pauri, Uttarakhand

2023-2027

TECHNICAL SKILLS

- **Programming Languages:** Python, C++, JavaScript
- **Web & App Development:** HTML, CSS, React.js, React Native, Node.js, Express.js, MongoDB, Expo Router
- **Machine Learning & AI:** Scikit-learn, Pandas, NumPy, OpenCV, YOLOv5, TensorFlow, Data Visualization
- **Tools & Platforms:** Git, GitHub, Firebase, Postman
- **Other Skills:** Data Structures & Algorithms, RESTful APIs

PROJECTS

VeloxAI — AI-Powered Job Application Automation Platform

GitHub

Technologies: React Native, Expo, Expo Router, JavaScript

- Developed an AI-driven platform that automatically searches and applies for jobs based on user preferences, skills, and resume data.
- Implemented intelligent automation workflows using **Python, APIs, and browser automation tools** to fill applications, upload resumes, and track job submissions efficiently.
- Designed features like resume parsing, personalized job matching, application tracking, and AI-assisted form filling to simplify and accelerate the job application process.

Witter

GitHub

Technologies: React.js, Node.js, Express.js, MongoDB, Tailwind CSS, JWT Authentication

- Built a social media platform enabling users to share posts, interact, and follow others
- Designed secure authentication, post-sharing features, and real-time user interactions
- Focused on creating a scalable, responsive, and engaging user experience

AI-Meet Summariser

GitHub

Technologies: Python, Transformers, SpeechRecognition, MoviePy, PyDub

- Developed an AI-based system to automatically extract and transcribe audio from recorded meetings
- Implemented transformer models to generate accurate and concise meeting summaries
- Enhanced productivity by automating the process of note-taking and information retrieval

EXPERIENCE

Machine Learning Research Intern

Jul 2025 – Aug 2025

NIT Kurukshetra

- Worked on analyzing and modeling weather station data to identify patterns and predict climatic parameters
- Applied data preprocessing, feature engineering, and supervised learning techniques to enhance model performance
- Evaluated multiple algorithms to achieve optimal accuracy and interpret results for real-world applicability
- Gained hands-on experience in Python, Scikit-learn, Pandas, and data visualization tools for ML research.
